

REMARKS

Prior to this amendment claims 13-88 were pending in the above identified application. Claims 13-88 are canceled herein. New claims 89-108 are added wherein claims 89,98,107,108 are independent claims. Thus claims 89-108 are pending in the application and are submitted for review.

Claims 89-108 are directed to a computer system for storing, organizing, digitizing and retrieving medical records, including a means of authenticating a digital record and a user by means of a digital physician signature library and/or a Biometric library of stored physician physical characteristics (fingerprint, eye scan). These elements distinguish the new claims over the prior art, including the Art cited previously by the examiner. Claims 98-106 are directed toward a method of creating a computer system for storing, retrieving, organizing and authenticating digital medical records and other patient data. Claims 107 and 108 Are directed to a computer system for storing, organizing, authenticating and retrieving medical records using a biometric characteristic of a physician or a system user.

It is respectfully submitted that claims 89-108 are patentable over the prior art.
